

## TE Projects for FY 2004 & 2005 have been selected

State Transportation Board Members have made their selections for the Transportation Enhancement (TE) projects for the FY 04 and 05 funding. A call for applications was held last September statewide. The deadline for submitting applications was November 3, 2003. GDOT received 338 applications statewide requesting over \$218 million in TE funds. There was only \$52 million available statewide for TE projects giving each Board Member \$4 million in their congressional district.

Once applications were received, there were technical reviews done by the Department to ensure the applications met the criteria and federal guidelines. Once the technical review was completed, the TE Advisory Panel was sent applications to review, rank, and makes recommendations to the Transportation Board Members. The Transportation Board Members then have the difficult task of selecting projects based on the technical reviews and TE Advisory Panel recommendations. Projects are selected by Congressional District and done individually by the Transportation Board Member representing the congressional district.

As a result we have 127 new projects being added to the program statewide. The list of new projects is sorted by Congressional District.
